

### Depreciation :

Is the amount of expense charged against the earning of a company to write off the cost of a product over its useful life, giving consideration to wear and tear, obsolescence and salvage value. If the expense is assumed to have been incurred in equal amounts over the life of the asset, the depreciation method used is the **Straight Line (SL) method**. If the expense is assumed to have been incurred in decreasing amounts in each business period, the method used is the **Written Down Value (WDV) method**.
